Reading for Life is an anthology of poems and of extracts from prose fiction, related to a series of case-histories of individuals carefully reading, discussing their reading lives, and thinking about the relation of literature to their existence. It enables readers to gain increased imaginative access to the works in question through seeing how they have intensely affected equivalent readers--a novelist, a poet, a doctor, a teacher, an anthologist, but also non-specialists, ordinary people within shared reading groups in many different settings, finding help from literary texts in times of often painful personal need. It is the story of the work done by Philip Davis' research unit, the Centre for Research into Reading, Literature and Society (CRILS), at the University of Liverpool, in a ten-year partnership with the outreach charity The Reader, taking serious literature to often neglected communities and struggling individuals through the shared reading--alive and aloud--of literature from all ages. Reading for Life is a detailed account of what reading literature can do for a wide variety of individuals in relation to a wide variety of texts: it will be of interest to serious readers in the wider world as much as to scholars working within literary studies, and to all those involved in thinking about the therapeutic interactions of literature and life in psychology, medicine, and mental health support settings.

Providing readers with the confidence needed to debate key issues in bioethics, this introductory text clearly explains bioethical theories and their philosophical foundations. Over 250 activities introduce topics for personal reflection, and discussion points encourage students to think for themselves and build their own arguments. Highlighting the potential pitfalls for those new to bioethics, each chapter features boxes providing factual information and outlining the philosophical background, along with detailed case studies that offer an insight into real-life examples of bioethical problems. Within-chapter essay questions and quizzes, along with end-of-chapter review questions, allow students to check their understanding and to broaden their thinking about the topics discussed. The accompanying podcasts by the author (two of whose podcasts on iTunesUTM have attracted over 3 million downloads) explain points that might be difficult for beginners. These, along with a range of extra resources for students and instructors, are available at www.cambridge.org/bioethics.

The story of Oxford University Press spans five centuries of printing and publishing, leading from the early days of printing to worldwide publishing in academic research, education, and English language learning. How Oxford gained its Press Volume I begins with the successive attempts to establish printing at Oxford from 1478 onwards. Expert contributors chart the activities of individual printers, the eventual establishment of a university printing house, its relationship with the University, and developments in printing under Archbishop Laud, John Fell, and William Blackstone. They explore the Press's scholarly publications and place in the book trade, and its growing influence on the city of Oxford.

Helps to develop students' ability to speak English fluently and confidently, especially in less formal contexts. Provides a useful source of ideas to supplement any coursebook at any level.

Based on the principle that English lessons form an integral part of a young learner's whole education, and that the teacher has a responsibility than the simple teaching of the language system. This work provides practical ideas for a variety of language practice activities, including art and crafts, drama, games, storytelling, and songs.

Stories motivate children to listen and learn, and help them to become aware of the sound and feel of English, and to understand language points, while enjoying the story. This resource book has a selection of ready-to-tell stories, although the activities can be used with any story.
